New! Auto2Fit 2.0 Released! (August 6, 2004)

Auto2Fit

[Introduction](#)[Screen Shots](#)[Example Problems](#)[Download](#)[Order](#)[Award](#)

Auto2Fit is a robust, flexible and state-of-the-art Win32 program. It use advance Optimization and Evolution Algorithms to handle complicated problems that are hard or impossible for regular/traditional approaches. With it, you can easily solve problems like:

- Regression and Curve Fit: linear, nonlinear, multi-nonlinear with no limitations on variable and parameter number
- Global Optimization: find the maximal/minimal value of any function. The function may be nonlinear, non continuous, non derivable.
- Equation Solve: solve any type of equation or system equations
- Model Auto-calibration: parameter estimation of complicated engineer model
- plot 2-D, 3-D cartesian and 2-D parametric function chart, especial for implicit functions

and much more...

Released (Version 2.0) (August 6, 2004)

NeuralPower

[Introduction](#)[Screen Shots](#)[Download](#)[Order](#)

Have you ever tried to find a idea tool for:

- Forecasting in Engineering, Financial and Stock Market.
- Classification and Pattern Recognition.
- Decision Mark and problem optimization.
- Time Series Analysis.

and much more...

Have a try of NeuralPower! A powerful, easiest-to-use and unmatched MLP neural network software package with many extra features you never seen before!

Version 2.6 Released! (April 15, 2004)E-mail: cpc-xsoftware@operamail.comWeb: <http://www.geocities.com/neuralpower>**Fc** 9791[FastCounter by bCentral](#)
